

## Common In-Suite Issues:

We've compiled a quick and easy guide to assist owners and residents with common in-suite issues:

### 1) Supply Lines

- Should an issue arise with any electricity or water lines within your unit, contact a licensed professional.

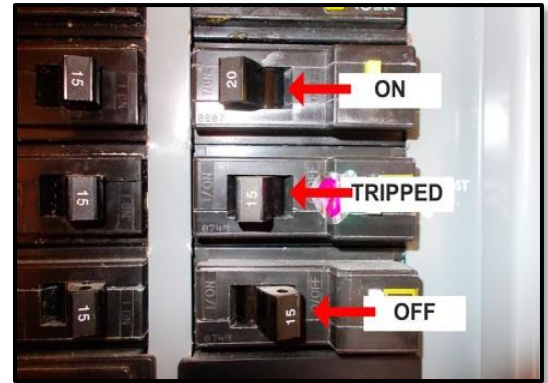

### 2) Water Shut Off Valves

- Main and secondary valves should be massaged twice a year to ensure proper function.
- If you need assistance with water shut off valves, you may contact a licensed plumber.

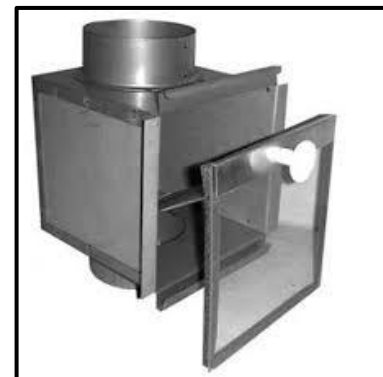

## 3) Electric Breakers

- If you experience any electrical issues within your unit, you may contact a fully licensed electrician.
- In the event just your unit loses power, contact a fully licensed electrician.
- Should multiple units lose power, please contact Oakville Hydro.

## 4) Exhaust Fans/Lint Traps:

- Kitchen and bathroom exhaust fans should be regularly cleaned and maintained.
- The dryer lint trap should be cleaned after each use.

## 5) Snow on Uncovered Balconies/Terraces:

- To prevent moisture retention, please safely remove all snow from your balcony/terrace.
- Please note that the use of ice melting products are prohibited.
